# ARFAH ALI

**Hey there! Meet Arfah Ali. I'm a skilled Full stack and Mobile App developer from Pakistan, specializing in a range of technologies including React, React Native, HTML, CSS, Tailwind CSS, Bootstrap, JavaScript, Next.js, Node.js, Express.js, MongoDB, and Firebase. I am well known for my expertise in developing E-commerce websites as a Full Stack developer as I am great at paying attention to the details.**

# SKILLS

## Key Proficiencies

**HTML/CSS**

**React**

**JS**

**React  
Native**

**Tailwind  
CSS**

**Node.js**

# AREAS OF EXPERTISE:

**Mobile  
Application  
Development**

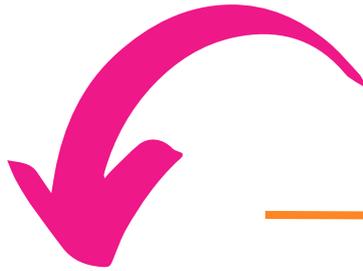

**MERN STACK  
Development**

**Java and  
Desktop App  
with FX**

**Databases  
(SQL and  
noSQL)**

---

**Microsoft Azure  
and Google  
Cloud**

---

# PROJECT HIGHLIGHTS

01

—————  
**SOCIETALIZE - SOCIAL  
NETWORK APP**

02

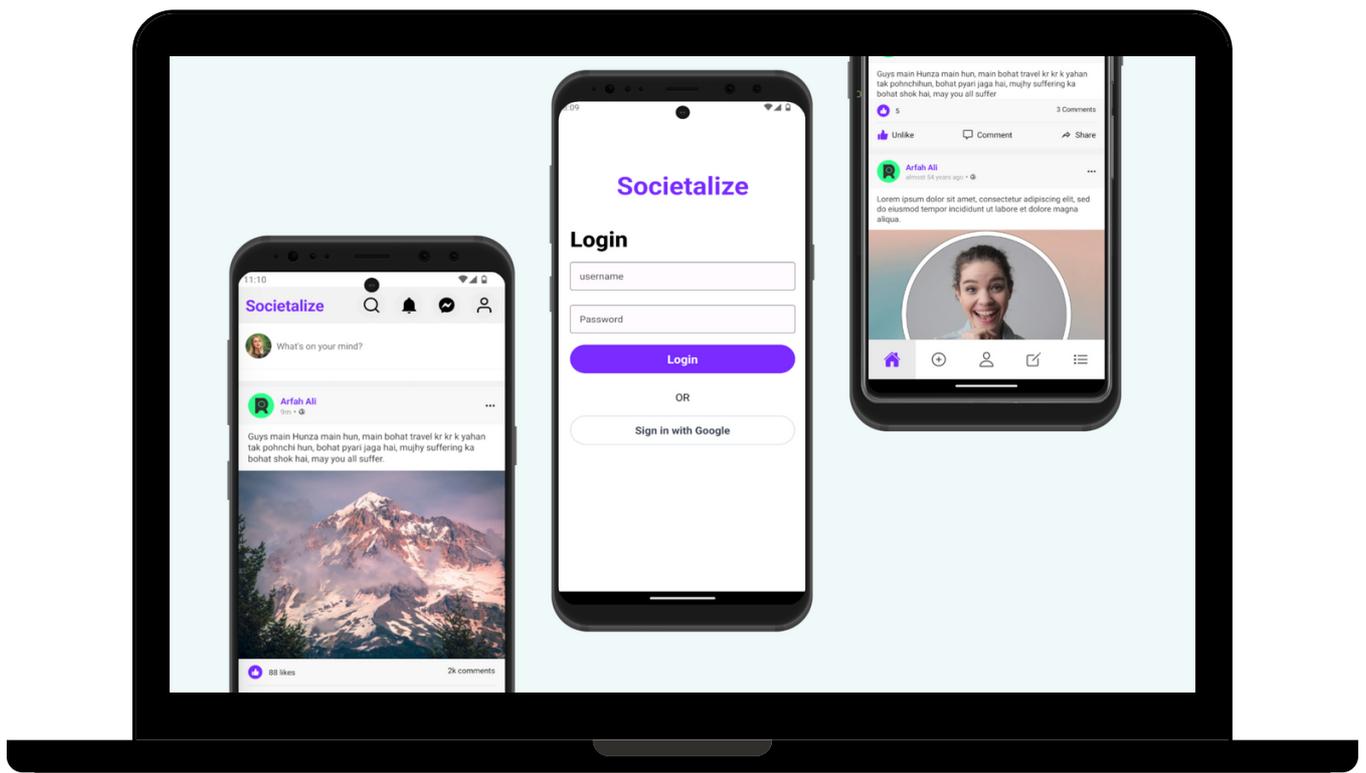

—————  
**CLEAN CLOTHES-  
LAUNDRY APP**

03

—————  
**E-COMMERCE WEB APP**

# 01

# SOCIETALIZE - SOCIAL NETWORK APP

---

Societalize App connects university students to campus societies, making it easy for newcomers to discover and join groups. Users can personalize their profiles, engage with society activities, and receive event notifications. Societies, on the other hand, can efficiently manage posts, events, and member interactions for a vibrant campus community.

### **Technologies Used:**

React, Tailwind CSS, Firebase

---

# KEY FEATURES

## **Society's Perspective:**

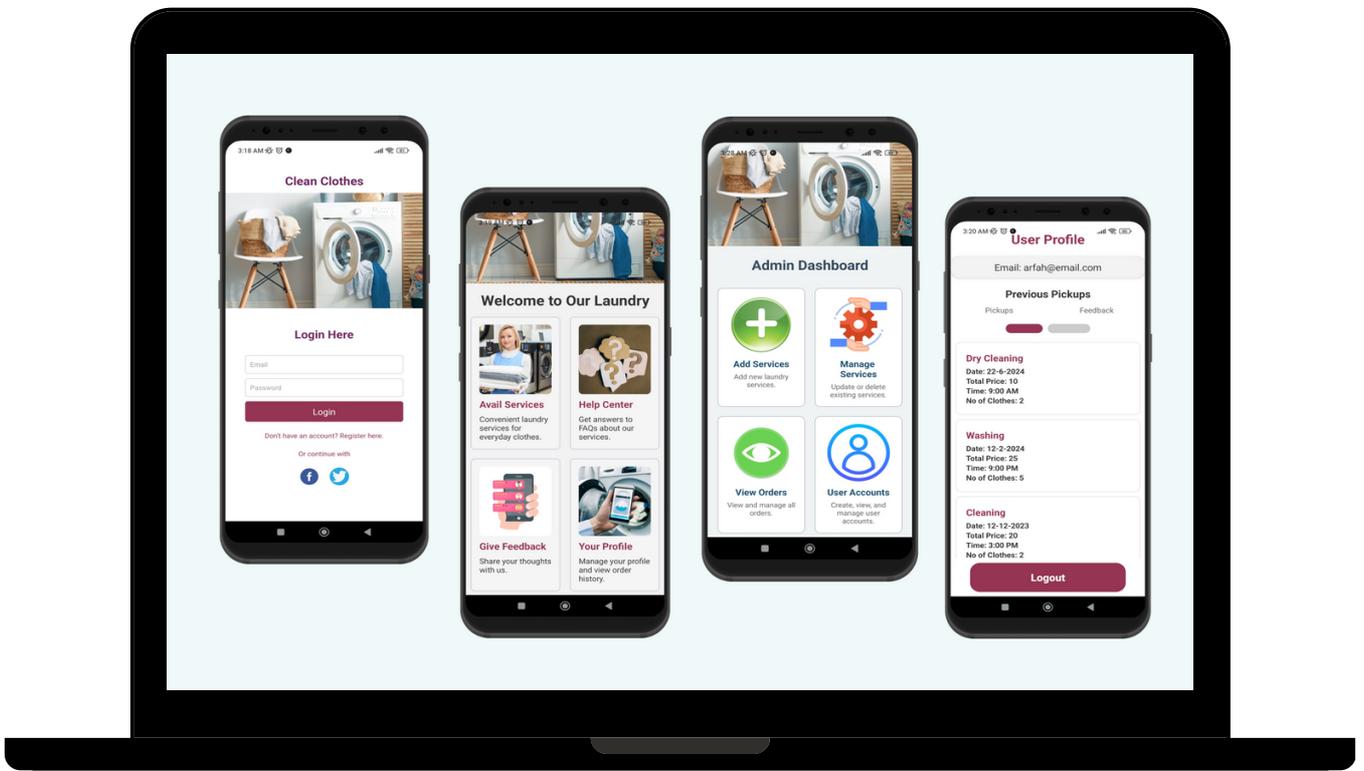

1. Can Login and sign-up/in with Google
2. Create and manage posts
3. Create events
4. Handle post interactions
5. Approval of Registration Requests
6. Student Verification

## **User's Perspective:**

1. Can Login and sign-up/in with Google
2. Customize profile
3. Engage with posts through comments and likes
4. Follow societies of interest
5. Receive event notifications
6. Register for Societies
7. Register for Events
8. Chat with Societies

# 02

# CLEAN CLOTHES - LAUNDRY APP

Laundry App simplifies the management of laundry-related tasks, saving time and effort for users. Admin features ensure efficient service oversight, contributing to a more organized and user-friendly community experience.

## Technologies Used:

React, Tailwind CSS, Firebase

# KEY FEATURES

## **Admin Board:**

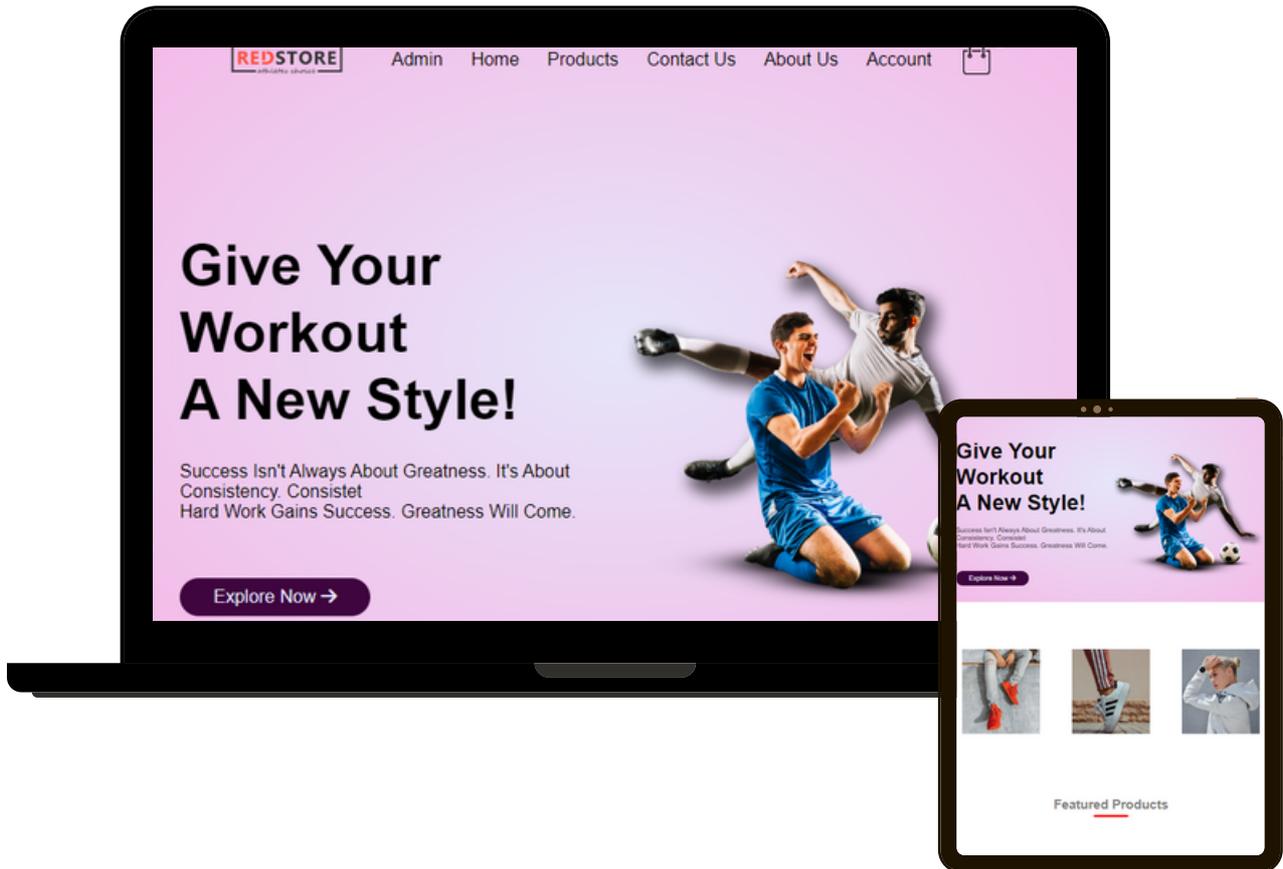

1. Add, edit, and delete services
2. Track customer orders
3. Monitor user accounts
4. Review and manage feedback

## **User Board:**

1. Avail laundry services
2. Provide feedback
3. Manage user profile
4. Access FAQs

# 03

## E-COMMERCE WEB APP

---

An intuitive E-Commerce Web App designed to provide users with a seamless online shopping experience. Users can effortlessly browse, select, and purchase products, while administrators efficiently manage inventory, process orders, and analyze sales data.

### **Technologies Used:**

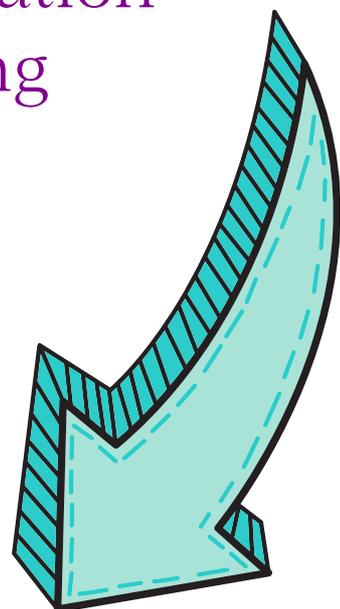

HTML, CSS, JavaScript, React (Frontend), Node.js, Express.js (Backend), MongoDB (Database)

---

# KEY FEATURES

## **Admin Board:**

1. Product Management (Add, Edit, Delete)
2. Order Processing and Fulfillment
3. User Account Oversight
4. Inventory Management
5. Sales Analytics and Reporting
6. Customer Support and Communication
7. Promotions and Discounts Management
8. Payment Gateway Integration
9. User Feedback Monitoring

# KEY FEATURES

## **User Board:**

1. Product Browsing
  2. Shopping Cart
  3. User Account Management
  4. Order Placement and Tracking
  5. Payment Options
  6. Product Reviews and Ratings
  7. Search and Filters
  8. View Order History
  9. Notifications (e.g., order updates, promotions)
- 

# QUESTIONS

Will you provide ongoing support after the app is delivered?

Ongoing support post-delivery is part of my service, ensuring any updates or issues are promptly addressed.

Do I have to buy Google Play Store & Apple App Store Account?

You'll need to buy your own Google Play Store and Apple App Store accounts, but I can assist you with the setup and submission process.

Do you provide cross platform compatibility?

I develop apps with cross-platform compatibility, so they work smoothly on both iOS and Android devices.
